[DOH-Bay Provides Preventive Dental Services to Incarcerated Juveniles](#)

Emalynn Mandapat and Kimberly Melnik, DOH-Bay Dental Hygienists

DOH-Bay's Children's Dentistry Clinic partnered with the Department of Juvenile Justice (DJJ) to provide preventative dental care to incarcerated juveniles at the Bay Regional Juvenile Detention Center. On April 5, using the DOH-Bay Mobile Dental Unit, staff provided preventive care to eight patients. "By bringing our dentistry clinic to these youth we hope to be able to prevent tooth decay and gum disease later in their life," said Sandon S. Speedling, MHS, CPM, CPH, DOH-Bay, Administrator and Health Officer.

Did You Know?

Creating a CHARTS account allows users to receive CHARTS updates and view data specific to their county automatically.

Most Viewed Indicators

1. Deaths from Homicide
2. Deaths From Suicide
3. Deaths from All Causes
4. Deaths from Motor Vehicle Crashes
5. Births by Mothers' Age
6. Median Household Income
7. Resident Live Births
8. Infant Mortality (Aged 0-364 Days)
9. Homeless Estimate
10. Human Immunodeficiency Virus (HIV) Diagnoses

Current Data About Reportable Diseases

Reporting suspected and confirmed reportable diseases and conditions is required by Florida law.

The **Reportable Disease Frequency Report** can be accessed under the "Data Queries" section on the lefthand side of the FLHealthCHARTS homepage.

How to create a report

Report Criteria:

- Counties – select one or many
- Diseases– select from the list of all reportable diseases in the report
- Diagnosis Status– confirmed and/or probable
- Acquired Status– location where acquired
- Age Group
- Report Date Range

Criteria with an asterisk (*) next to them are required.

Reportable Diseases Frequency Report ?

The frequency report below is based on [reportable disease information](#) received by the Florida Department of Health as mandated under Section 381.0031, Florida Statutes, and Rule 64D-3.029, Florida Administrative Code. Depending on report criteria, counts include confirmed and/or probable cases that have occurred in Florida among Florida residents. This report does not include cases of AIDS, HIV infection, sexually transmitted diseases, or tuberculosis. Also if there are no cases for your selection, you will see an empty grid.

Report Criteria

Note: For maximum performance, limit your selections for counties, diseases and specify a short date range.

* - indicates required field.

Understanding Your Report

1. List of what is in the report (your selections)
2. Reportable Disease Frequency Report data
3. Sum of all selected counties

Note: No data will be displayed if there are no cases, and some diseases and conditions do not occur frequently.

You may expand your selections to include more counties, more diseases or more time in the “Report Criteria” section.

Reportable Diseases Frequency Report

The frequency report below is based on reportable disease information received by the Florida Department of Health as mandated under Section 381.0031, Florida Statutes, and Rule 64D-3.029, 1 residents. This report does not include cases of AIDS, HIV infection, sexually transmitted diseases, or tuberculosis. Also if there are no cases for your selection, you will see an empty grid.

Report Criteria

Note: For maximum performance, limit your selections for counties, diseases and specify a short date range.

Florida Annual Morbidity Statistics Report

The Florida Morbidity Statistics Report is based on reportable disease information received by county and state health department staff from physicians, hospitals, and laboratories throughout the state obtained through passive and active surveillance. It is a resource to medical and public health authorities at county, state, and national levels. This report is significant because it serves as the final and official record of occurrences of reportable disease and diseases of environmental origin in Florida for the corresponding year. Data summarized in the report are used to identify patterns and trends of disease incidence that are used as the scientific basis for development of disease control and prevention strategies and policy.
