Current Features

March 10 is National Women and Girls HIV/AIDS Awareness Day

In 2016, 91% of women in Florida diagnosed with HIV acquired it through heterosexual contact, whereas 9% acquired it from injection drug use. Eight percent of young women (ages 13–24) diagnosed with HIV in 2016 acquired it through injection drug use compared to 1% of young men (ages 13–24). Among women, those 50 years of age and older represent the age group with the highest

Benefits:

- *Instantly view your county's data*
- *Receive CHARTS update notices*

Update Email

The screenshot shows the FLHealthCHARTS website header with a settings gear icon circled in red. Below is the 'Change Email' form. It includes a text box for the existing email (John.Doe@flhealth.gov), a note about email confirmation, a text box for the new email (Jane.Doe@flhealth.gov), and a confirm email text box with a clear button (X). At the bottom are 'Update Email' and 'Back' buttons.
