FLHealthCHARTS

Community Health Assessment Resource Tool Set

That is CHARTS!

QUICK FACTS

Single health-related data source

FLHealthCHARTS is a single source for healthrelated data that comes from many different programs and agencies.

Over 4,400 health indicators

Most data are updated annually, but some are updated quarterly. Query systems are updated daily with current, provisional vital statistics

Identifies local health issues

FLHealthCHARTS helps communities get data they need to identify local health issues and develop community health plans

Helpful features

Include tutorials and a search box to help you get started on CHARTS.

Data notes and sources

Relative information is provided at the bottom of the page for each indicator, and data can be exported to Microsoft Excel.

Stay up-to-date

Create an account to set a preferred county and receive a monthly email about the latest updates.

Profiles and Dashboard Reports

View a profile or dashboard report to see a collection of data about a health topic with just one click. Reports vary by topic.

Some examples are:

- Health Summary reports that help assess a county's overall health status by providing data about a wide range of topics.
- Population Specific reports that focus on a particular health issue such as aging, asthma, child health, chronic disease, oral health and more.
- Social and Behavioral Health reports that address substance use, suicide and human trafficking.

FLHealthCHARTS

OVERVIEW

Health Indicators

Obtain specific health data featuring definitions, data interpretation notes and helpful links. Customize the view by selecting specific ages, races or ethnicity groups. Understand a county's relative ranking using quartile comparisons to other Florida counties. View state and county data side by side. Options vary by indicator.

Here are some features:

- Indicator description, data interpretation and helpful links
- Change the measure type (single, multi-year)
- Select specific ages
- View a 10-year report
- Select a county
- Select a race/ethnicity group
- Sort the columns
- Find out more about the indicator

Community Maps

Community maps provide census tract-level data and ZIP code-level data about births, deaths and social determinants of health. Compare tracts or ZIP codes using quartiles.

8.08 8.09 9.01 9.02 10 

Query Systems

Build a custom report with query systems. Birth, death, infant death, fetal death, marriage, divorce, population and reportable disease query systems are available. Provisional data is updated each day.
